

## GENEVA SOUND SYSTEM – MODEL L

From the Swiss firm that invented hifi for the iPod, GenevaSound is furniture music – a renewed fusion of home entertainment and home decor. This is a hand-made design statement in a single box that's also powerful enough to compete with a conventional multi-box high-end home audio system. One look reveals why it's sold in design and fashion houses from Manhattan to Milan. Listen and you'll know why its patented audio engineering is found in recording studios that repeatedly win Grammys and Oscars. Visually, Geneva is a classic design statement. But beyond its striking simplicity, Geneva's clean lines embody an advanced acoustical array that's won the highest marks from leading audio reviewers.

### WHAT'S INSIDE

- A** Two full-range 5.25" woofers
- B** Two 1" tweeters
- C** Two bass ports
- D** Each speaker individually powered & sealed for accurate acoustics
