

GENEVA SOUND SYSTEM – MODEL S

GenevaSound S is the smallest hifi, ever, less than 6", yet with full-sized high fidelity. Perfect for the bedroom, kitchen, office and more. It includes innovations that make hifi easier, and more eye-pleasing: a new PowerDock connector, new TouchLight controls, and a digital radio with alarm clock. TouchLights brighten on hand contact, giving extensive iPod menu control that other small systems lack. When the iPod/iPhone is removed, the motorized PowerDock spins closed to protect it. There's a choice of three colors, and a table stand for less clutter on nightstand, countertop or desk.

DIMENSIONS
