

**GENEVA SOUND SYSTEM – MODEL XXL**

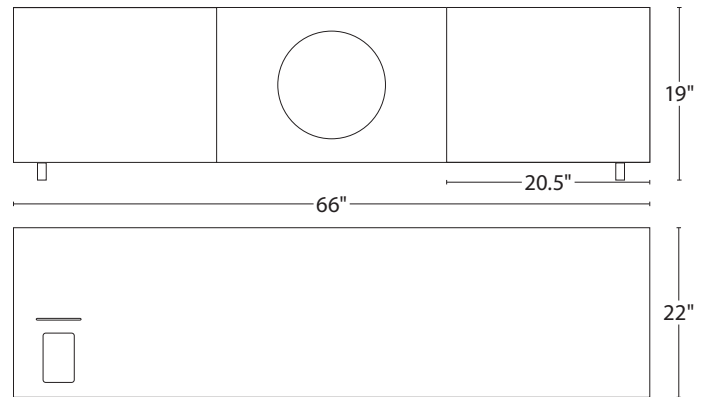

Home theater never looked better. **GenevaSound XXL** fuses all the audio and furniture into one streamlined sideboard. It eliminates the hassles and complexity of home theatre – a first since the advent of HDTV.

The piano-lacquered wood credenza of the XXL integrates a 700-Watt digital amplifier, powering seven speakers, with 12-inch subwoofer. Each speaker is individually powered and sealed in its own chamber for accurate, balanced acoustics. There is a sleek, slot-loading CD player. There is a radio receiver. There is an iPod+iPhone dock which also streams video from the handheld to the big screen. There is interior space for components like a set-top box, game console, DVD player and more.

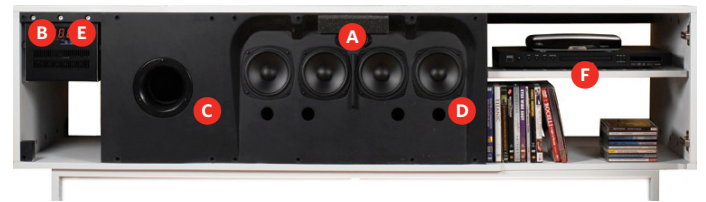

**WHAT'S INSIDE**

- A** Wide, deep surround sound from 7 speakers
- B** 7 powerful, all-digital 100 watt amplifiers (7 x 100 = 700 watts)
